Do your science writing skills need polishing?

This special course will expand and enhance your skills for scientific and technical writing.

Special Topics in Journalism: Writing on Science and Technology

A 2 credit professional training in writing for science and technology will be offered October 17th – December 7th.

This special topic in journalism will provide students with resources and skills for researching, writing, and polishing science and technology articles for consumer magazines, newspapers, and professional journals. Students will develop a "sixth sense" about the best science story opportunities, learn to investigate, interview, and translate complex ideas into compelling prose. Topics will cover the fields of biotechnology, social science, healthcare industry, natural and earth sciences, space and engineering.

Prerequisites: Must be a sophomore or above and have completed a freshmen writing sequence or equivalent. Faculty/staff or non-matriculated students who want to enroll in the course must do so through the Office of Continuing Education. To register in person, please visit the Journalism Office on the third floor of Annenberg or contact Yvonne Fairfax for additional information at 215-204-8346 or by email yfairfax@temple.edu.

The course will meet October 17 to December 7, MW 9:40-11:30 a.m.

Instructor: Arielle Emmett
